Work done in last Week with description :

Week 8 (Date :22th March 2024 to 28th March2024) :

- 1) OSINT framework

Plans for next week:

- 1) MOBSF TOOL

Task

➤ OSINT Framework

- OSINT Framework is an open-source intelligence (OSINT) tool that provides a comprehensive framework for conducting OSINT investigations. It is designed to help investigators gather and analyze publicly available information from various sources, such as social media, search engines, and online databases. The OSINT Framework is organized into several categories, each containing a list of tools and resources for conducting OSINT investigations.
- The main categories of the OSINT Framework are:
 - Social Networks: This category contains a list of tools and resources for conducting OSINT investigations on social media platforms, such as Facebook, Twitter, and LinkedIn. It includes tools for searching and analyzing social media profiles, as well as resources for identifying fake accounts and tracking online activity.
 - Web Search: This category contains a list of tools and resources for conducting web searches and analyzing search engine results. It includes tools for searching specific websites, as well as resources for identifying and analyzing website metadata.
 - People: This category contains a list of tools and resources for conducting OSINT investigations on individuals, such as email addresses, phone numbers, and usernames. It includes tools for searching public records, as well as resources for identifying and analyzing online activity.
 - Locations: This category contains a list of tools and resources for conducting OSINT investigations on specific locations, such as addresses, coordinates, and landmarks. It includes tools for searching maps and satellite imagery, as well as resources for identifying and analyzing geolocation data.
 - Infrastructure: This category contains a list of tools and resources for conducting OSINT investigations on infrastructure, such as IP addresses, domain names, and network devices. It includes tools for searching and analyzing network data, as well as resources for identifying and analyzing network infrastructure.
 - Darknet: This category contains a list of tools and resources for conducting OSINT investigations on the darknet, such as Tor and I2P networks. It includes tools for searching and analyzing darknet content, as well as resources for identifying and analyzing darknet activity.
 - Metadata: This category contains a list of tools and resources for conducting OSINT investigations on metadata, such as file headers, image tags, and document properties. It includes tools for searching and analyzing metadata, as well as resources for identifying and analyzing metadata sources.

Total Working Hrs: —25 Hours—

Signature of Student:

The above entries are correct and the grading of work done by Trainee is

Excellent	Very Good	Good	Fair	Below Average	Poor
