Student's Weekly Report of Internship

Student Name:	PATEL ANKIT VINAYBHAI		
Enrollment Number:	201260107012		
Name Of Organization:	State Cyber Cell-CID		
External Guide Name:	Mr. Nikhil Prajapati		
External Guide Contact details:	Email:	nik02907@gmail.com	Mob No: 9825073823
Internal Faculty Guide Name:	Prof. Krupa Suthar		

Work done in last Week with description :

Week 5 (Date :1ST March 2024 to 7th March2024) :

1) FALCON TOOL

Plans for next week:

1) FTK TOOL

Task

➤ **FALCON TOOL**

- Falcon, developed by CrowdStrike, is a cloud-native endpoint protection platform (EPP) and endpoint detection and response (EDR) solution. It is designed to protect endpoints (such as desktops, laptops, servers, and virtual machines) from a wide range of cyber threats, including malware, ransomware, exploits, and advanced persistent threats (APTs). Here's a detailed explanation of Falcon and its key features:
- **Cloud-Native Architecture:** Falcon is built on a cloud-native architecture, leveraging the scalability, flexibility, and resilience of cloud infrastructure. This architecture allows Falcon to deliver real-time threat detection, prevention, and response capabilities across large-scale environments without requiring on-premises hardware or infrastructure.
- **Endpoint Protection:** Falcon provides comprehensive endpoint protection capabilities to safeguard endpoints from cyber threats. It includes features such as next-generation antivirus (NGAV), anti-malware, exploit prevention, behavior-based detection, and machine learning-based threat detection to prevent known and unknown threats from compromising endpoints.
- **Endpoint Detection and Response (EDR):** Falcon offers advanced endpoint detection and response capabilities to detect, investigate, and respond to security incidents on endpoints. It continuously monitors endpoint activity, collects telemetry data, and uses behavioral analytics and threat intelligence to identify suspicious behavior and indicators of compromise (IOCs).
- **Real-Time Threat Intelligence:** Falcon integrates real-time threat intelligence from CrowdStrike's Falcon Intelligence platform, as well as third-party threat feeds, to enhance its detection capabilities and stay ahead of emerging threats. It leverages this threat intelligence to identify and block malicious activities, files, and behaviors on endpoints.
- **Incident Investigation and Response:** Falcon enables security teams to quickly investigate and respond to security incidents on endpoints through its centralized management console. It provides detailed visibility into endpoint activity, facilitates forensic investigations, and supports remote remediation actions to contain and mitigate threats.
- **Endpoint Visibility and Control:** Falcon offers granular visibility and control over endpoints, allowing security teams to monitor endpoint activity, enforce security policies, and manage endpoint configurations from a single dashboard. It provides insights into endpoint inventory, software vulnerabilities, compliance posture, and user activity.
- **Threat Hunting:** Falcon includes built-in threat hunting capabilities that enable security teams to proactively search for and identify hidden threats and suspicious activities on endpoints. It provides customizable search queries, indicators of attack (IOAs), and hunting playbooks to streamline the threat hunting process.

- **Integrations and Extensibility:** Falcon integrates with a wide range of security tools, SIEM (Security Information and Event Management) platforms, threat intelligence feeds, and orchestration platforms to streamline security operations and enhance overall security posture. It also offers an open API (Application Programming Interface) for custom integrations and extensibility.

Total Working Hrs: —~~25 Hours~~—

Signature of Student:

The above entries are correct and the grading of work done by Trainee is

Excellent	Very Good	Good	Fair	Below Average	Poor

Signature of External Guide with Company Seal:
